Vendor Description:

Founded in 1988, IGI Global, headquartered in Hershey, Pennsylvania (USA), is an innovative international publishing company specializing in the publication of research-based reference works including books, encyclopedias, journals, teaching cases, proceedings, and databases focusing on the subject areas of: engineering, healthcare, business, education, social science, library science, environmental science, public administration, computer science, and the humanities. IGI Global produces high-quality scholarly publications aimed at providing research communities, industry practitioners, professionals, corporations, and academic research libraries with reference publications on emerging innovations in diverse fields.

- Stay in the know - visit the IGI Global Newsroom!
- Follow us on Facebook, Twitter, and LinkedIn for company updates and events.
- View our online catalogs!
-

All IGI Global content, including individual IGI Global e-books, e-journals, and our premier research databases, is available through our state-of-the-art, XML-powered platform and search engine:

The **InfoSci® platform** is one single, centralized, and personalized gateway for your institution!

Features of the InfoSci® Platform:

- IP Authentication to content
- Unlimited simultaneous access 24/7 with no limitations
- Full-Text XML/HTML and PDF viewing options
- Liberal DRM: users can download, print and copy the text with unlimited simultaneous access – however our system will notify us with any suspicious activities such as downloading the entire book
- Precise search and retrieval through chapter-level abstracts and indexing
- COUNTER Compliance usage statistics

Current free trials for all B-on members are going on now until March 19th 2015 for the following database collections:

InfoSci®-Books — is highly regarded and has been recommended by a number of prestigious publications and librarians in the field. This database currently includes IGI Global's complete book collection: more than 2,600 reference books and over 58,000 full-text book chapters. Hundreds of titles are added to this collection annually, with new books added on a weekly basis. This number will only increase in future copyright years.

InfoSci®-Journals – contains content from over 150 active full-text journals which equates to more than 13,000 individual articles. IGI Global journals are cited in some of the most credible indices such as: *Thomson Reuters, Scopus, Compendex, PsycINFO, INSPEC, and Cabell's Directories*

HOW TO ACCESS: visit the InfoSci® platform at www.igi-global.com/gateway. As a B-On member, you should IP authenticate to the platform. If you have difficulty, please have your librarian contact B-On.

IGI Global's InfoSci®-Books and InfoSci®-Journals present the best value for institutions, as they contain all book and journal content respectively. InfoSci®-Books also includes IGI Global's high-ticket major reference works (multi-volume books, encyclopedias, and handbooks of research), such as the Encyclopedia of Information Science and Technology, Third Edition (10 Volumes), which was just released in July. All databases are heavily discounted from the sum of their respective individual title/journal list prices; B-On

members will enjoy special discount levels if interested in purchasing or subscribing to the collections – please contact IGI Global for more information.

Information regarding all of IGI Global's e-resources collections can be found at:
